

SHIELDED TRANSPARENT MICRO OPTICS

STANDARD DOE

SHIELDED DOE

LASER

SHIELDED DOE

KEY FEATURES

- > Transparent
- > Wear and chemical resistance
- > Enables new type of integration (flexible and thin, lamination enabled)
- > Maximal safety
- > Shielded DOE
- > Enables high accuracy for optical structure

SPECIFICATIONS

- > Thickness 25-500 μm
- > Materials PET, PC, PMMA
- > Transparent

APPLICATIONS

- > ID protection
- > Security (bank notes, credit cards, ticket etc)
- > Brand protection

FLEXIBLE LIGHT GUIDING

NANOCOMP
